**Subject:** Bachman Services Update  
**Date:** 08/02/2012 09:37 AM

---

1. The Building sump has been pumped out and some items have been removed from the building.
2. Last night the storm drain from the building to the outfall was flushed out by the cleanup contractor.
3. Soil samples will be taken today starting at 1pm with a 24 hour turn around for results.

Sampling will include 2 samples from Area one (1) and 3 samples from Area two (2). Samples will go three (3) feet deep in a bank-bottom-bank series. Analytical testing will include any chemicals that showed up from the analytical results on the sample pulled from the frac tank last week.
